WA TOP 100

BD World Architecture's annual survey of the top global practices ranks companies by the number of fee-earning architects they employ. There has been a reshuffle among the practices in the top 10 – and a new number one for 2012

RANK 2012	RANK 2011	NEW ENTRY	PRACTICE NAME	COUNTRY	ARCHITECTS EMPLOYED	ARCHITECTS PREVIOUS YR	FEE INCOME (US\$ MILLION)
1	2		Aedas	UK/China/USA	1,497	1,133	\$180-189m

SHOWA SEKKEI	74
COUNTRY JAPAN	
LAST RANKING 71	
ARCHITECTS EMPLOYED 136	

Showa Sekkei's urban design for Luoyang, China.

Showa Sekkei has steered a steady course over the past couple of years. Its place in the rankings, the number of architects it employs and its fee income remain virtually unchanged.

One of its specialisms is hospitals and it has been working on a number of these, including a psychiatric hospital in Tokyo. Another key project in 2011 was a corporate office for a seaweed processing firm, Kurakon.

As well as architectural design, the practice has a water infrastructure wing and it is hoping to expand this too in 2012. The region it is most hoping to crack is south-east Asia.

Showa Sekkei provides a comprehensive architectural design and consultancy throughout project processes, from the planning of development phase to the completion of building. Our professional services are characterised by applying techniques of "Urban design, Architects, and Water & Sewage."
